The Department of Toxic Substances Control (Department) hereby amends Imminent and Substantial Endangerment Order and Remedial Action Order (Order) I/SE-90/91-004A by adding the following provisions:

7.4. In December 1998, a consultant employed by the City of Daly City, Lowney Associates, collected soil samples from the portion of the site known as Bayshore Park. Some of the soils were found to contain PNAs at levels which could be potentially hazardous to human health.

7.5 In June 2000, a consultant employed by the Department, URS Corporation, collected soil samples from both Midway Village and Bayshore Park. Some of the soils were found to contain PNAs at levels which could be potentially hazardous to human health.

**16.3.8 Explanation of Significant Differences**

16.3.8.1 Midway Village. Due to the additional contamination described in paragraph 7.5, Respondents shall work with the Department to prepare an Explanation of Significant Differences to the remedy in the Final Remedial Action Plan dated August 13, 1993, which describes the results of the sampling conducted in 2000, updates the cleanup level, identifies additional areas which require remediation and identifies additional remediation activities which will be performed at the Site. Additionally, Respondents shall update or prepare the following documents: transportation plan, excavation plan, soil management plan, grading plan, health and safety plan, dust control plan and air monitoring plan.

16.3.8.2 Bayshore Park. Due to the additional contamination described in paragraphs 7.4. and 7.5, Respondents shall work with the Department to prepare an Explanation of Significant Differences to the remedy in the Final Removal Action Workplan dated July 1998, which updates the cleanup level, identifies additional areas which require remediation and identifies additional remediation activities which will be performed at the Site. Additionally, Respondents shall update or prepare the following documents: transportation plan, excavation plan, soil management plan, grading plan, health and safety plan, dust control plan and air monitoring plan.

16.3.8.3 Submittal of Plans. Within thirty (30) days of the effective date of this Order, Respondents shall submit the plans described in 16.3.8.1 and 16.3.8.2.

16.3.8.4 Implementation of Additional Remedial Actions. Within 30 days of approval of the Explanations of Significant Differences and implementation documents, Respondents shall implement the additional remedial actions.

16.4.1 Within five (5) days of the effective date of this Order, Respondents shall identify the name of the project coordinator who will be implementing the work described in 16.3.8.1 and 16.3.8.2.

16.5.1 Within five (5) days of the effective date of this Order, Respondents shall identify the name of the project engineer/geologist who will be implementing the work described in 16.3.8.1 and 16.3.8.2.

EFFECTIVE DATE

This Amended Order is issued and effective upon signing on the date noted below.

Date of Issuance: 04/11/01
